

# PocketSphinx - Sphinx for handhelds

PocketSphinx is a lightweight speech recognition engine, specifically tuned for handheld and mobile devices, though it works equally well on the desktop. It is released under the same permissive license as Sphinx itself.

## Where can I get it?

PocketSphinx downloads have been moved to the [CMU Sphinx SourceForge Site](#). The latest version is [0.5](#). To build it, you also need [SphinxBase 0.4](#).

## More information, please!

For more information, see [The CMU Sphinx Documentation Wiki](#).
